# SWS Inntech Claims Intersec 2026 Award: Best Homeland Security Solution for Automated Armory

*Conrad Dubai, United Arab Emirates (UAE)*

SWS Inntech Sdn. Bhd., Malaysia's pioneering Malaysian-owned technology firm specializing in automated storage solutions, has made history as the first Malaysian company to secure a finalist spot in the Intersec Awards 2026. Their cutting-edge Automated Armory Solutions earned this elite nod in the Best Homeland Security Solution category, hosted by Messe Frankfurt at Dubai's premier security expo. This breakthrough spotlights Malaysia's homegrown ingenuity redefining firearm management for military and law enforcement worldwide.

Past Intersec Awards records show no prior Malaysian winners or finalists in homeland security, a field long led by UAE, European, and Middle Eastern giants. SWS Inntech breaks through with solutions like the SWS-MPS 30 Multi Pistol Storage—featuring 30 individual biometric-secured lockers with 7” LCD touch screens, optical fingerprint scanners, and NFC readers—and the SWS-EMS Series for electronic multi-storage with real-time inventory control and monitoring. These systems tackle unauthorized access, theft, and compliance risks head-on, evolving from basic safes to trusted tech adopted by agencies like Singapore Police.

Engineers crafted cloud-synced analytics, tamper-proof hardware, RFID tracking, and scalable designs for high-stakes operations, impressing 23 judges from NFPA, ASIS International, and beyond. This validates decades of R&D in automated storage, positioning SWS Inntech for global exports and partnerships amid rising security demands. The firm's focus on paradigm-shifting access control sets new standards for safer, audit-ready armories.

As finalists gear up for the grand January 2026 gala at Intersec Dubai—the world's foremost fire, safety, and security expo drawing thousands of industry leaders—SWS Inntech stands tall as a rare Southeast Asian beacon among global heavyweights. This milestone not only crowns years of relentless innovation but propels the firm toward expansive exports, strategic alliances, and heightened visibility across Asia, Europe, and the Middle East.
